**ov-silence chapter three
OSR004CD**

- is about to hit the stores around the globe in November 2004 !!!

With their previous releases ov-silence recordings have already testified the label's good taste with their versatile and fresh blend of new and previously unreleased tracks. Their third compilation undermines that the psy-trance scene is vividly progressing. Covering all prevailing branches of the genre, ov-silence chapter three intermingles progressive and full-on tunes to a mindbending sonic potion

From some of the local artists known from the previous ov-silence recordings' releases like **6th Floor**, **Block 4 vs. Jo Yummy** and **Auralis** - to the widely traveled productions from **FREq** and **Atma & R'Tur** - it features the young and fresh talents of **Neelix**, **Tomtron & Liesegang**, **Audiomatrixx**, **Psytrain** and **Xenical**.

With their third chapter ov-silence makes another leap forward to further develop the sound of the label and fortify it's place on both the wandering psyelectric trancefloors of the open-air festivals and the urban trance clubs around the globe alike.
